

COMPANY OVERVIEW

Sensible Equipment Company, Inc. provides the proprietary TRICOIL System. TRICOIL enhances the indoor air quality by precise control for the indoor temperature and humidity control, increasing ventilation air rates, purification of air and surfaces, increased air filtration efficiency. TRICOIL is excellent for the mitigation of indoor pollutants, VOC's, bacteria, and viruses.

PRODUCTS

Fan Coil Units

These affordable, compact units are perfect for installation in hotels, apartments, schools, and other multi-office buildings as they take up minimal space, offering quiet operation and simplified maintenance. Offered in a variety of designs.

Air Handling Units for Enhanced Indoor Air Quality

Air Handling Units (AHU) provided for recirculation air applications with up to 100% outside air

Dedicated 100% Outside Air Systems (DOAS)

Air Handling Units (AHU) and be provided as Dedicated Outdoor Air Systems (DOAS) application. Units are provided with a wide variety of options.

PUMP/VALVE ASSEMBLIES

A Pump/Valve Assembly is used to contain control valves, temperature controls, flow control valves and pumps where applicable. These are particularly useful when AHUs and DOAS are provided in modules and require field piping. The Assemblies can be provided as floor mounted, wall mounted and in NEMA enclosures for outdoor or hazardous locations.

DIFFERENTIATORS

We have Registered Professional Engineers on staff. We can provide engineering services for all the products we sell. This includes designing the installation of any manner of Air Handling Units (AHU), Fan Coil Units (FCU), and Dedicated Outside Air Units (DOAS).

We can arrange for the installation of all the products we sell providing a Turnkey Project Delivery. Turnkey projects we have provided such as air handling systems for numerous indoor shooting ranges and fan coil units and DOAS for dormitories.

SENSIBLE EQUIPMENT COMPANY, INC.

1015 Webster AVE Orlando,
Florida 32804-2850,
United States

UEI: ZHM2X74SJDR4

CAGE Code: 8SF30

NAICS CODES

Primary NAICS: 333415 - Air-Conditioning And Warm Air Heating Equipment And Commercial And Industrial Refrigeration Equipment Manufacturing

Secondary NAICS: 541330

CORE COMPETENCIES

- Fan Coil Units
- Air Handling Units Enhanced for IAQ
- Dedicated Outside Air System (DOAS)
- Pump and Valve Assemblies

SERVICES

Psychrometric Studies

A psychrometric study is a means of confirming that the air conditioning system design will produce the desired indoor air quality results. The study will indicate how much cooling will be required and how much reheat will be required.

PAST PERFORMANCE

State of Missouri

Provided two TRICOIL Dedicated Outside Air Systems (DOAS) for Higginsville Habitation Facility

- **Start Date:** 09/23/2015
- **End Date:** 06/16/2016
- **Value:** \$87,000

Indian River State College, Florida

Provided TRICOIL air handling unit with installation for tactical indoor shooting range.

- **Start Date:** 2009-02-09
- **End Date:** 2010-02-10
- **Value:** \$160,800

Stetson University, Florida

Provided TRICOIL air handling units for seven sorority buildings

- **Start Date:** 2012-12-06
- **End Date:** 2013-12-10
- **Value:** \$230,000
